Profile in 24 Hours

Quick action checklist — what to change today so your profile works for you

Tinder | Instagram | WhatsApp | Badoo / Bumble

PRIORITY

3 changes with the biggest impact — start here

If you have an hour today, do these three things. The rest of the checklist is for those who want to go further.

CHANGE 1 — BIGGEST IMPACT

Audit and replace your main photo

Open Tinder (or Badoo). Look at your main photo as a stranger would. Criteria: direct gaze, full face visible, standing upright, natural expression, context makes sense.

If it doesn't meet 4 of 5 criteria: replace it today. Go through your phone albums — you're looking for a photo where you're in a natural environment, face is clear, expression is alive. Don't have one? Go outside this afternoon and ask a friend for 20 shots.

CHANGE 2

Rewrite your bio using the formula

Take the formula from Bio Formula and write a new bio today. Rule: max 3 lines, one specific detail, one implicit invitation.

Test: read the bio out loud. Does it sound like you — or like someone else? If it's the latter, rewrite.

CHANGE 3

Delete one photo that's weakening your profile

Go through all the photos in your profile. Which one isn't sending the right signals? Mirror selfie, group photo where you're not clearly visible, a photo where you look tired or forced?

Delete it. Fewer photos with good signals is better than more photos with mixed signals.

PLAN

Complete 24-hour profile update plan

For those who want a comprehensive update — every platform step by step.

1

HOURS 0–2: PHOTO AUDIT AND SELECTION

Go through your phone photos. Select 6–8 candidates for your profile. Criteria: you visible, natural expression, different contexts. If none qualifies — you're planning a photo session today or tomorrow.

2

HOURS 2–4: BIO REWRITE

New bio for Tinder and Badoo/Bumble. Use the formula from Bio Formula. Let the bio sit for 30 minutes then re-read it — your first instinct is right.

3

HOURS 4–8: INSTAGRAM GRID REVIEW

Go through your first 9 Instagram photos. Count photos with you in them — must be at least 4. Missing? Add an archived photo or plan new ones. Check your highlights.

4

HOURS 8–24: WHATSAPP UPDATE

Open your WhatsApp profile. Check your profile photo (meets the criteria?), status (adds value or says nothing?), visibility settings (my contacts).

Platform by platform

Tinder — checklist

- ✓ Main photo: you, direct gaze, natural expression, not in a crowd
- ✓ 2nd–3rd photo: social proof or lifestyle
- ✓ Bio: max 3 lines, identity + contrast + invitation
- ✓ No photo with an ex, no group photo as main
- ✓ Instagram link: only if the profile is good
- ✓ Total photo count: 4–6 (not more — each extra must have a reason)

Badoo — checklist

- ✓ Profile 100% complete
- ✓ Verified profile (via phone or photo verification)
- ✓ Interests: specific, not generic
- ✓ Bio: 2–4 sentences, identity + contrast, ending with an open question
- ✓ Same photos as Tinder, but possibly different order

Bumble — checklist

- ✓ Bio ending with an open invitation (she needs to have something to write about)
- ✓ At least 3 different "doors" in your profile — things she can react to
- ✓ Prompts filled in (if Bumble offers them) — specific answers, not generic
- ✓ Main photo: ideally different from Tinder (for testing)

Instagram — checklist

- ✓ At least 4 photos with you in the first 9
- ✓ Highlights: min 2 relevant (travel, hobby, friends)

- ✓ Profile public or semi-public (not private)
- ✓ Bio: shorter version of Tinder bio — who you are and one specific interest
- ✓ Last post: not older than 2–3 months

WhatsApp — checklist

- ✓ Profile photo: you, natural light, expression matching your signal
- ✓ Status: adds value or empty (not weak text)
- ✓ Last seen: set to "My contacts"
- ✓ About: deleted or one specific sentence (not "Hey there!")
